Wireless IP Camera appIP01WV3

Wireless IP Camera that combines high quality digital video, network connectivity and a powerful Web server, to provide clear monitoring on your PC through your local network or the Internet. The basic function is to transmit remote video over an IP network. The camera can transmit high quality images at a rate of 30fps in the LAN / WAN using hardware compression technology MJPEG. Based on the standard TCP / IP.

You can use the Wireless IP Camera to monitor special places in your home or office. You can also control and manage the camera image by simply accessing the Web.

- Motion Detection
- Remote Control
- Various positioning angles

NIGHT VISION

PRODUCT FEATURES
